By JOHN MALHAM,

AUTHOR OF NAVIGATION MADE EASY AND FAMILIAR, AND OTHER WORKS ON NAVAL AFFAIRS.

ILLUSTRATED WITH

SEVENTEEN CORRECT CHARTS, from the lateſt and beſt Surveys, Including a Whole Sheet CHART of the WORLD, on MERCATOR's Projection.

LONDON:

PRINTED AND PUBLISHED BY M. ALLEN, NO. 15, PATERNOSTER-ROW.

ADDRESS to the PUBLIC.

THE general utility and importance of a Work of this nature muſt be ſtrikingly obvious, when it is conſidered that nothing of the kind has hitherto been offered to the Public.

Gazetteers, and geographical deſcriptions of particular Places and Countries, have indeed been multiplied, but what may be called NAVAL GEOGRAPHY has not even yet been attempted.

The Mariner has been left to procure a ſcanty information from ſources widely diffuſed and with difficulty obtained; he has had no Elementary work to refer to, no practical Guide in caſes of Danger and Diſtreſs; no accurate deſcriptions or faithful repreſentations of Coaſts, Harbours, Ports, and Bays, which could afford him READY Aſſiſtance in Difficulties, or give him Confidence in a State of Uncertainty.

To have Recourſe, on every occaſion, to Charts, Coaſting Pilots, &c. is not only extremely troubleſome and inconvenient, from the general unaccommodating Size of ſuch Performances, but alſo attended with conſiderable Expence.

The preſent Work is therefore intended to obviate theſe Inconveniencies, by bringing into one Point of View, the various Dangers and Difficulties which preſent themſelves to NAVIGATORS, in ſailing into or out of any Port, Bay or Harbour in the Known World, and by ſupplying proper Directions and neceſſary Cautions for different Coaſts, Capes, Rocks, and Promontories, to render NAVIGATION not only more eaſy and expeditious, but alſo more ſafe and convenient.

But while the Work affords uſeful and neceſſary Information to the leſs inſtructed Seaman; it is equally important to the experienced Navigator, the Merchant, and thoſe engaged in the EDUCATION OF YOUTH, as a Book of Reference; in which, at once, may be found whatever is wanted with reſpect to NAVAL GEOGRAPHY.

In the execution of this difficult taſk, the Author has omitted nothing that was within his Reach, to render the Work extenſively uſeful. The beſt Voyages and Charts have been critically examined and compared; and he has been favoured with private Communications from various Quarters; hence he has Reaſon to believe its ſuperior Correctneſs, and therefore confidently to hope for the Patronage and *Support* of a generous *Public*.

CHARACTER OF THE WORK.

"THIS is a Geographical Dictionary, deſigned for the Uſe of Navigators. In the Introduction is given a Treatiſe on Geography, which includes an Account of the Winds and Tides; and ſome nautical Obſervations are added which are very uſeful, particularly thoſe reſpecting the Management of Veſſels on a Lee-Shore.—In the geographical Deſcriptions, the Author has given Directions for avoiding Dangers, and all other Information that he could collect neceſſary for Pilotage; and he has carefully conſulted the Diſcoveries of modern Navigators.—The Whole bears the Mark of Diligence and Ability; and we are of Opinion that the NAVAL GAZETTEER is a valuable Addition to the Seaman's Library."

Monthly Review for July, 1797.

"We may venture to recommend the NAVAL GAZETTEER as an important Acquiſition in the Study of maritime Affairs, and no leſs uſeful to the general STUDENT and to the MERCHANT. The Charts are numerous, and diſtinctly delineated."

Critical Review for September, 1797.

☞ This Work unites ſo much Entertainment with Inſtruction in maritime and mercantile Affairs, that it has been found particularly improving to Youth by drawing their Attention in thoſe Periods of Leiſure which frequently occur in fine Weather at Sea, and is therefore a valuable and acceptable Preſent to Perſons entering on a Sea-faring Life, or learning Navigation.—The two Volumes may be had elegantly bound in Calf and Gilt, Price One Guinea.
